Education

B.M.S College of Engineering B.E. in Computer Science and Engineering (IoT) CGPA: 9.0/10	Bangalore, Karnataka Dec 2022 – Jun 2026
Base PU College Pre-University Course (PCMC) 93%	Bangalore, Karnataka Jun 2020 – Mar 2022

Experience

Software Engineering Intern – Bullwork Mobility Pvt Ltd Bangalore, Karnataka	Jan 2026 – July 2026
- Developed backend APIs for a vehicle monitoring platform using Node.js, PostgreSQL, Redis, and ClickHouse. - Built a real-time monitoring service that classified vehicle telemetry data into events, warnings, and faults for operational dashboards and alerting. - Wrote Jest test cases for backend services to improve code reliability, maintainability, and coverage. - Contributed to a crop-health analytics pipeline using CVAT, Docker, and ML workflows for crop classification, disease prediction, and severity assessment.	
Software Engineering Intern – ArisInfra Solutions Ltd Bangalore, Karnataka	Jul 2025 – Dec 2025
- Performed financial data analysis using SQL and Gremlin to derive business metrics, validate datasets, and support data-driven decision-making. - Built an n8n-based workflow automation solution to generate Purchase Orders and Sales Orders from Excel inputs via internal APIs, reducing manual effort.	

Projects

- Blockchain-based Real Estate DApp:** Built with **Solidity, Hardhat, and React** using NFT-based property tokens and escrow contracts with buyer, seller, lender, and inspector roles; tested with Chai and Mocha.
- Smart Voter Application:** Built a secure backend using **Node.js, MongoDB, and JWT** with email verification and rate limiting; supports user registration, vote casting, and results access
- Blockchain-Enabled Smart Water Allocation System:** Built a smart irrigation system integrating **IoT sensors, ML models, Hyperledger Fabric, and Cassandra** to optimize water allocation with automated motor control and immutable records.
- Smart Parking System:** Developed an ESP32-based IoT parking system using IR sensors, servo motors, and Blynk. Automated vehicle detection, parking slot occupancy tracking, and gate control while providing real-time parking availability updates through a cloud-connected dashboard.

Technical Skills

Languages:	Java, JavaScript, C, C++,
Web:	Node.js, Express.js, React.js, HTML, CSS, REST APIs
Databases:	MongoDB, PostgreSQL, ClickHouse, Redis, Cassandra, SQL
Blockchain:	Solidity, Hardhat, Hyperledger Fabric
Tools:	Git, GitHub, Docker, Postman, n8n, CVAT
Testing:	Jest, Chai, Mocha

Activities & Achievements

- Won prizes in multiple mathematics competitions organised by the college Mathematics Club.
- Volunteered at college technical and cultural fests, assisting in event coordination and execution.
- Participated in social initiatives including plantation drives, walkathons, and community-awareness activities.
